Forecast for Sunday 15 Dec 2024

Weather: Cloudy with outbreaks of rain or drizzle, heavy at times across western fells but lighter elsewhere and perhaps fizzling out for a time early in the afternoon. Becoming very windy through the afternoon.

Chance of cloud-free hill tops above 800m: Almost zero chance.

Low cloud and visibility: Extensive cloud and fog down to low slopes giving difficult conditions for navigation. Cloud lifting to about 500m for a spell in the afternoon. Away from cloud, hazy, occasionally a few kilometres in rain or drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A milder day but still feeling cold on the tops in the strong winds and wet conditions. Winds strengthening through the afternoon with gusts 50 to 60mph making walking and balance increasingly difficult.

Forecast for Monday 16 Dec 2024

Weather: Mostly cloudy with outbreaks of showery rain, but a little brightness at times. Very strong and gusty winds on the tops, easing later.

Maximum wind: West or Southwest 40 to 45mph with gusts 60mph, gradually easing in the afternoon.

Chance of cloud-free hill tops above 800m: 10% becoming 40%.

Low cloud and visibility: Extensive cloud and fog above 400m, rising to 700m in the afternoon. Away from cloud, mainly good visibility with brief reductions in rain.

Temperature: **Valleys:** Plus 10 or 11C.
At 800m: Plus 5 or 6C.
Freezing level: Well above summits.

Mountain Weather Forecast

Ground Conditions Supplement

Date: Saturday 14 December 2024 Location: Helvellyn summit at 12:30 Full report: There is currently a distinct lack of winter on the Lake District fells. Some rime (ice) was forming and exposed terrain beginning to freeze above 900m but generally it was a relatively mild and damp day with a few showers. The last few remaining snow patches are to be found above 850m in sheltered hollows and on steep north through east aspects. These are easily avoided by walkers. A chilly north west wind was giving nearly minus ten degrees C of windchill so full winter clothing comprising plenty of layers and a wind & waterproof shell plus gloves and a hat are essential to safely enjoy the fells. The next few days will give challenging conditions with gale force winds and tricky navigation due to limited visibility in the low lying cloud. Temperature: minus 0.4 C, Maximum wind speed 25.9 mph, Wind chill: minus 9.2 C, Average wind speed: 20.1 mph. Issued at: 1118 on Sat 14 Dec 2024
